"Another North Country weekend under our belts; and another weekend where Jim and the team gave us every opportunity to have a stunning time. Five dad's, 11 kids, a few million gallons of water, someone in the back of the boat who loves their job, and a place to unwind after it all, where you get to meet the nicest folks on the planet. We'll be back next year for sure and will continue to grow our numbers. Thanks for doing such a great job year after year."

Kennebec River

Big Waves, Big Whitewater, Big Fun!
Maine's Most Popular River

"Whitewater rafting on the Kennebec yesterday with the family...an amazing experience! We had two rafts. The guide for our raft, Reily, was great and extremely supportive, knowledgeable and had a lot of experience. Our raft had the oldest (my mother) and the youngest (my niece)."

We all had a wonderful and memorable time. It was a great bonding experience; even more so for the children, for whom it was one of the high points of the one-week vacation in Maine. Thank you North Country Rivers. . . hope to come again!"

Penobscot River

The Most Challenging
Whitewater in New England

"Rafting on the Penobscot can be summed up simply as one of the biggest thrills and one of the most peaceful times wrapped together. Obviously, the rapids are the source of the thrills but the time in between is so peaceful ...just the sound of the river, beautiful scenery, a salmon fisherman or two and maybe even an eagle ... so relaxing. Bobby was a great guide who made the trip very enjoyable. The river lunch was met with much anticipation ... nothing like eating outside after a day on the river. Kudos to the guys.."
Paul – Fredericton, NB, Canada

The Penobscot is the most technically challenging river in Maine and one of the best in the United States. You will experience more technical rapids, exposed rocks, steeper gradients and awesome whitewater.

The river is set in the shadow of mile high Mt. Katahdin and on the perimeter of Baxter State Park. Eagle, osprey, moose and bear sightings are not uncommon, while the river abounds with salmon and trout.

TRIPS OFFERED ON THE PENOBSCOT:

"We had an awesome time last year Rafting with North Country Rivers. My Troop is still talking about the Trip.

Their specials for Scout Troops were THE BEST in the industry, no one comes close. We camped at their campground and had breakfast in their dining room. They were easy to work with and their facilities and equipment were excellent. One of my parents was so impressed they came back the following week for one of North Country's Turbine Test release trips. My Troop is looking to make rafting with North Country Rivers a regular event."

THE MOOSE (ALCES ALCES)

Moose roam in abundance in Maine. They are also BIG animals. An adult moose, averages 1000 pounds and stands 6 feet at its shoulder (the largest wild animal in North America). Moose have keen senses of smell and hearing, but they're also near-sighted. Their front legs are longer than their hind legs, allowing them to jump over fallen trees, slash, and other debris. Moose, like deer, lack a set of upper incisors. This requires them to strip off "browse" and bark. Bulls and cows have different coloration patterns. Bulls have a dark brown or black muzzle, while the cows face is light brown. Cows also have a white patch of fur just beneath their tail.

Only bulls grow antlers. Antler growth begins in March or April and is completed by August or September when the velvet is shed. Antlers are dropped starting in December; young bulls may retain their antlers into early spring. Yearlings develop a spike or fork; adults develop antlers that may weigh up to 60 pounds with wide sweeping palms with many long tines. The bell the flap of skin and long hair that hangs from the throat, is more pronounced in adult bulls than in cows or immature bulls.

WHERE TO SEE MOOSE

Cows (female moose) prefer to keep their calves near water as an escape route. Ponds are used by both sexes to escape from moose flies and other pesky insects. "Moose wallows" form in regularly wet areas on the side of roads where road salt accumulates. Moose visit these areas to drink, and satisfy their salt requirements.

WHEN TO SEE MOOSE

Moose are most active in the early morning and early evening hours. Just before sunset moose will roam in search of saplings or salt. Moose are vegetarians and often seek out the young saplings.

PHOTOGRAPHING MOOSE

If you do see moose, use a zoom or telephoto lens to bring the creature up close. Do not try to walk up to a moose.
